

# HANG EM HIGH

## TECH RIDER 2016

### **PA**

---

High Quality 4-Ways System . NEXO/ L-ACOUSTICS / ADAMSON / D&B or similar.  
The system must be powerful enough to deliver a loud, clean and undistorted sound with a uniform coverage of the entire audience including balconies etc... and be totally free of hum and noise. System controllers should be located at FOH position and fully unlocked for adjustments. A qualified sound engineer/system-operator has to be present at all times.

In most cases we travel without sound-engineer so we ask to provide a professional sound technician for our show, preferably one who knows the venue. A qualified light and tech personell is required during soundcheck and concert.

### **BAND**

---

**BOND** - 2string slide bass, 4 string bass, electronics  
**LUCIEN DUBUIS** - tenor sax, bass & contrabass clarinets  
**ALFRED VOGEL** - drums, pots & pans, junk percussion
